About this guide

This chapter includes the following topics:

- [Introduction](#)
- [End of support policy for Veritas software](#)
- [Enterprise Vault and Microsoft products](#)
- [Original releases and service packs](#)
- [Key](#)

Introduction

The *Compatibility Charts* provide information about the compatibility of Enterprise Vault, Compliance Accelerator, and Discovery Accelerator 10.0, 11.0 and 12.

To obtain the *Compatibility Charts* for older versions of Enterprise Vault, click the following links:

- [Enterprise Vault 6.0](#)
- [Enterprise Vault 7.0](#)
- [Enterprise Vault 8.0](#)
- [Enterprise Vault 9.0](#)

End of support policy for Veritas software

Enterprise Vault 10.x and 11.x are now past their End of Standard Support date but have not yet reached their End of Support Life date. For details, see the following article on the Veritas Support website:

<https://www.veritas.com/docs/100038896>

For information about the end of life policy for Veritas software, see:

- [Veritas End of Life Policy](#)
- [Veritas Product End of Life](#)

Enterprise Vault and Microsoft products

Veritas is committed to ensuring that Enterprise Vault works effectively with the various products found in a typical Microsoft collaboration environment. We are committed to ensuring that Enterprise Vault adds value to the latest releases from Microsoft in the following product families:

- Exchange
- Office and Outlook
- Windows
- SQL Server
- SharePoint
- Skype for Business

To this end, we try to provide support for new releases from Microsoft in those areas within 90 days after the general availability of the releases from Microsoft. In some cases, support may take longer than this, but we try to meet this objective to provide our customers the best interoperability with Microsoft products.

Microsoft update rollups and hotfixes are supported unless otherwise stated.

Original releases and service packs

Where a table shows a specific version of Enterprise Vault, for example 11.0, support is on Enterprise Vault 11.0 OR and all its service packs unless stated otherwise. For example, in the table in the "Windows email clients" section, Outlook 2007 OR is supported by all versions of Enterprise Vault 10.0 and 11.0.

See "[Windows email clients](#)" on page 52.

We implicitly support all minor releases and cumulative updates (CUs) unless stated otherwise; for example, if we support version X.Y we implicitly also support version X.Y.n. This support assumes that only minor changes such as defect fixes are included in these releases. When there are more significant changes in functionality, we reserve the right to explicitly remove our support if these changes affect the product's integration with Enterprise Vault.

Key

The values in the tables in this guide have the following meanings.

CU	Cumulative Update.
OR	Original Release.
OSR	OEM Service Release.
SP	Service Pack.
Y	Use of the combination of products is supported.
N	Use of the combination of products is not supported.
P	Pending. Use of the combination of products is not currently supported. Following testing, this value will change to Y or N.

Enterprise Vault core dependencies

This chapter includes the following topics:

- [Introduction](#)
- [Operating system](#)
- [Standalone Enterprise Vault Administration Console](#)
- [Enterprise Vault API Runtime](#)
- [Enterprise Vault Server support for Add-Ins](#)
- [Domain and forest functional levels](#)
- [Microsoft SQL Server](#)
- [.NET Framework](#)
- [Microsoft ISA Server and Forefront TMG](#)
- [Microsoft Outlook on the Enterprise Vault server](#)
- [Microsoft Management Console \(MMC\)](#)
- [Web browsers](#)
- [Server virtualization](#)
- [Clustering](#)
- [Citrix](#)
- [Microsoft Operations Manager \(MOM\) and System Center Operations Manager \(SCOM\)](#)

- [Veritas backup agents for Enterprise Vault](#)
- [FIPS 140-2 compliance](#)
- [IPv6 support](#)

Introduction

The core dependencies comprise the following:

- Enterprise Vault Server support for Enterprise Vault Add-Ins for email clients
- Features and services that Enterprise Vault needs to function

The dependencies listed are not the same as prerequisites, as not all features are needed in every installation of Enterprise Vault.

Operating system

The following table shows the supported combinations of server operating system and the Enterprise Vault Server.

Table 2-1 Operating system

Item	Version	Enterprise Vault		
		10.0	11.0	12
Windows Server 2003	All versions	N	N	N
Windows Small Business Server	2003, 2008, 2012	N	N	N
Windows Storage Server	2003, 2008, 2012, 2016	N	N	N
Windows Server 2008	All versions	N	N	N
Windows Server 2008 x64 edition (using WOW64)	SP1, SP2	N	N	N
	R2, R2 SP1	Y [1,2]	Y [2,3]	N
Windows Server 2008 x64 edition	All versions	N	N	N
Windows Server 2012	OR	Y [1,4,5]	Y [4,6]	Y [4,6]
	R2	Y [1,5,7]	Y [6]	Y [6]

Table 2-1 Operating system (*continued*)

Item	Version	Enterprise Vault		
		10.0	11.0	12
Windows Server 2016	OR	N	N	P

- 1 Legacy SMTP archiving is not supported on 64-bit editions.
- 2 Installation of the Enterprise Vault Deployment Scanner on a Windows domain controller is not supported.
- 3 If Windows Server 2008 R2 or R2 SP1 is installed on the Enterprise Vault 11.0.1 server, you must install the Microsoft hotfix [KB2698365](#).
- 4 Requires Microsoft hotfix [KB2878182](#).
- 5 Requires Enterprise Vault 10.0.4.
- 6 Enterprise Vault Servers on a Windows Server 2012 require additional configuration before you use Enterprise Vault Search. See [KB2803161](#).
- 7 The Prepare My System option in the Enterprise Vault 10.0.4 Install Launcher does not work on Windows Server 2012 R2.

Standalone Enterprise Vault Administration Console

The following table shows the supported client operating systems for the standalone Enterprise Vault Administration Console, which runs on a separate computer from the Enterprise Vault server.

The standalone Enterprise Vault Administration Console version must be the same as the Enterprise Vault server.

Table 2-2 Standalone Enterprise Vault Administration Console

Item	Version	Standalone Administration Console		
		10.0	11.0	12
Windows Vista	OR	N	N	N
	SP1 or later	Y	N	N
Windows 7	All versions	Y	Y	Y [1,2]
Windows 8	OR	Y [3]	Y	Y

Table 2-2 Standalone Enterprise Vault Administration Console (*continued*)

Item	Version	Standalone Administration Console		
		10.0	11.0	12
Windows 8.1	OR	Y [3]	Y	Y
Windows 10	OR	N	Y [4]	Y
	Anniversary Update 1607	N	Y [4]	Y
	Creators Update 1703	N	Y [5]	Y
	Fall Creators Update 1709	N	Y [5]	Y

- 1 Requires the Microsoft hotfix [KB2640696](#) for Windows 7 OR.
- 2 Requires an [activation configuration file](#).
- 3 Requires Enterprise Vault 10.0.4.
- 4 Requires Enterprise Vault 11.0.1 Cumulative Hotfix 3 or later.
- 5 Requires Enterprise Vault 11.0.1 Cumulative Hotfix 4.

Enterprise Vault API Runtime

The following table shows the supported combinations of operating system and the Enterprise Vault API Runtime.

Table 2-3 Enterprise Vault API Runtime

Item	Version	Enterprise Vault API Runtime		
		10.0	11.0	12
Windows Vista x86 and x64 editions	OR, SP1, SP2	Y	N	N
Windows 7 x86 and x64 editions	OR, SP1	Y	Y	Y
Windows 8 x86 and x64 editions	OR	Y	P	Y
Windows 8.1 x86 and x64 editions	OR	Y	Y [1]	Y

Table 2-3 Enterprise Vault API Runtime (*continued*)

Item	Version	Enterprise Vault API Runtime		
		10.0	11.0	12
Windows 10 x86 and x64 editions	OR	N	Y [2]	Y
	Anniversary Update 1607	N	P	Y
	Creators Update 1703	N	Y [3]	Y
	Fall Creators Update 1709	N	Y [3]	Y
Windows Server 2003, 2003 R2 x86 and x64 editions	OR, SP1	N	N	N
	SP2	Y	N	N
Windows Server 2008 x86 and x64 editions	OR, SP1, SP2	Y	N	N
Windows Server 2008 R2	OR, SP1	Y	Y [4]	N
Windows Server 2012	OR	Y [5,6]	Y [5,7]	Y [5,7]
	R2	P	Y [1,7]	Y [7]
Windows Server 2016	OR	N	N	Y [8]

- 1** Requires Enterprise Vault 11.0.1.
- 2** Requires Enterprise Vault 11.0.1 Cumulative Hotfix 3 or later.
- 3** Requires Enterprise Vault 11.0.1 Cumulative Hotfix 4.
- 4** If Windows Server 2008 R2 or R2 SP1 is installed on the Enterprise Vault 11.0.1 server, you must install the Microsoft hotfix [KB2698365](#).
- 5** Requires Microsoft hotfix [KB2878182](#).
- 6** Requires Enterprise Vault 10.0.4.
- 7** Enterprise Vault Servers on a Windows Server 2012 require additional configuration before you use Enterprise Vault Search, see [KB2803161](#).
- 8** Requires Enterprise Vault 12.1 or later.

Enterprise Vault 10.0.3 and earlier require the Enterprise Vault server and API Runtime versions to be the same. The following table shows the supported combinations of Enterprise Vault server and API Runtime for Enterprise Vault 10.0.4 and later.

Table 2-4 Supported combinations of Enterprise Vault server and API Runtime

Item	Version	Enterprise Vault API Runtime		
		10.0	11.0	12
Enterprise Vault Server	10.0.4	Y	Y	N
	11.0	Y	Y	Y
	12	N	Y	Y

Note: Enterprise Vault 10.0.4 server and API Runtime are not compatible with earlier versions.

Enterprise Vault Server support for Add-Ins

The following table shows the supported combinations of Enterprise Vault Server and Enterprise Vault Add-Ins for email clients.

Table 2-5 Enterprise Vault Server support for Add-Ins

Item	Version	Enterprise Vault Server		
		10.0	11.0	12
Enterprise Vault Add-Ins	9.0	Y	N	N
	10.0	Y	Y	N
	11.0	Y	Y	Y
	12	N	Y	Y

Domain and forest functional levels

Enterprise Vault supports all Active Directory (AD) and Active Directory Domain Services (AD DS) functional levels for the following:

- Windows 2000
- Windows Server 2003
- Windows Server 2008
- Windows Server 2008 R2
- Windows Server 2012
- Windows Server 2012 R2
- Windows Server 2016

Microsoft SQL Server

Note: Enterprise Vault supports SQL databases only at their default compatibility levels. For more information about SQL database compatibility levels, see <http://msdn.microsoft.com/en-us/library/bb510680.aspx>.

- 1 Requires Enterprise Vault 10.0.4.
- 2 Requires Enterprise Vault 10.0.2 or later service pack.
- 3 AlwaysOn Availability Groups are not supported.
- 4 The use of supplementary characters in the range U+10000 to U+10FFFF is not supported.
- 5 AlwaysOn Availability Groups are not supported on SQL Server 2012 SP2 CU3, CU4, and 2014 CU5. If you already have these versions of SQL Server installed, see [KB3034679](#) for the hotfix.
- 6 Requires Enterprise Vault 10.0.4 Cumulative Hotfix 3 or later.
- 7 Requires Enterprise Vault 11.0.1.
- 8 Requires Enterprise Vault 12.1 or later.
- 9 FSA Reporting is not supported.

.NET Framework

Note: The System Status display requires .NET Framework 3.5 SP1 to be installed on the computer that is running the Administration Console.

Table 2-7 .NET Framework

	4.7	P	Y [2]	Y [2]

- 1 Enterprise Vault 11.0.1 or later require .NET Framework 4.5.2 or later as well as .NET Framework 3.5 SP1.
- 2 Enterprise Vault requires .NET Framework 3.5 SP1 even if a later version is already installed.

Microsoft ISA Server and Forefront TMG

The following table shows support for Microsoft Internet Security and Acceleration (ISA) Server and Microsoft Forefront Threat Management Gateway (TMG) 2010.

Note: Microsoft Forefront TMG 2010 has reached end of life. See [Microsoft Lifecycle Policy](#) for more information.

- 1 See <https://www.veritas.com/docs/100017406>.
- 2 Supports Exchange Server archiving of Exchange Server 2007 or older targets only.
- 3 Support is dropped for Outlook 2003 on Enterprise Vault 11.0.1.
- 4 Requires Microsoft hotfix [KB948073](#). To use this hotfix, you need to set the registry entries mentioned in the Microsoft Knowledge Base article [KB948074](#). The recommended registry value is 0xFFFFFFFF.
- 5 See <https://www.veritas.com/docs/100001480>.
- 6 Set the registry entries described in the Microsoft Knowledge Base article [KB952295](#). The recommended registry value is 0xFFFFFFFF.
- 7 This is the minimum supported service pack of Outlook 2007 for Exchange Server archiving of Exchange Server 2010 targets. However, we recommend you install Outlook 2007 SP3.
- 8 Requires Microsoft hotfix [KB2475891](#).

- 9 To target Exchange Server 2013, you must install Outlook 2007 SP3 with update package KB2596598 or later update.
- 10 This is the minimum supported service pack of Outlook 2007 for Exchange Server archiving of Exchange Server 2013 targets.
- 11 Supports only 32-bit version of Outlook.
- 12 The use of Outlook 2013 on the Enterprise Vault server is not supported for Exchange Server 2003 targets.
- 13 To run Enterprise Vault archiving with MAPI over HTTP on Exchange Server 2013 SP1 or later service packs, see <https://www.veritas.com/docs/100040583>.
- 14 Click-to-Run version is not supported.
- 15 Requires Enterprise Vault 11.0.1.
- 16 Requires Enterprise Vault 12.2.
- 17 Requires Microsoft hotfix [KB3191883](#).
- 18 Does not support Exchange Server 2010.
- 19 Supports only MAPI over HTTP on Exchange Server 2013 SP1 and Exchange Server 2016. Does not support Outlook Anywhere and RPC connection methods.
- 20 Public folder archiving is not supported.

Microsoft Management Console (MMC)

Web browsers

The following table shows web browser support for Enterprise Vault legacy web applications (that is, Archive Explorer, Browser Search, and Integrated Search), opening archived items in HTML view (View Original Item), and Enterprise Vault OWA Extensions for OWA 2010 and earlier. The browsers may be installed on any

supported Windows operating system. Internet Explorer must be installed, even if a different browser is used.

For compatibility with Enterprise Vault Search, which was introduced in Enterprise Vault 11.0, see [About Enterprise Vault Search](#).

Edge	OR	N	N	N
Google Chrome	All versions	N	N	N
Mozilla Firefox	All versions	N	N	N
Safari	All versions	N	N	N

- 1 Supported only in Compatibility View. For more information, see <https://www.veritas.com/docs/100031459>.
- 2 Requires Enterprise Vault 10.0.3 or later service pack.
- 3 Requires Enterprise Vault 10.0.4.

Server virtualization

Enterprise Vault supports the use of all virtualization technologies that run supported versions of the Windows operating system.

When you deploy Enterprise Vault on virtual servers, you should consider the performance limitations of each virtualization platform relative to the information in the Enterprise Vault *Performance Guide*. See <https://www.veritas.com/docs/100000918>.

Enterprise Vault supports VMware High Availability, and the VMware vCenter Converter Standalone tool.

- 1 Active/passive clusters, in which one or more active nodes can fail over to a passive node, are supported. Active/active clusters are not supported.
- 2 If Windows Server 2008 R2 or R2 SP1 is installed on the Enterprise Vault 11.0.1 server, you must install the Microsoft hotfix [KB2698365](#).
- 3 Requires Microsoft hotfix [KB2878182](#).
- 4 Requires Enterprise Vault 10.0.4.
- 5 Enterprise Vault Servers on a Windows Server 2012 require additional configuration before you use Enterprise Vault Search, see [KB2803161](#).

- 6 If you cluster Enterprise Vault 12.1 or earlier versions in a Windows Server failover cluster, you must deploy the 64-bit DLLs to all the nodes in the cluster. See <https://www.veritas.com/docs/100032928>.
- 7 The Prepare My System option in the Enterprise Vault 10.0.4 Install Launcher does not work on Windows Server 2012 R2.
- 8 Enterprise Vault supports only non-secure clusters.
- 9 Excludes support for Enterprise Vault SCOM pack for clustering.
- 10 Requires Enterprise Vault 10.0.4. Earlier service packs require appropriate hotfix (see <https://www.veritas.com/docs/100007970>).
- 11 VCS agent for MSMQ is supported only on Windows Server 2008 R2 and Windows Server 2012. You cannot configure MSMQ on systems running Windows Server 2012 R2.
- 12 If a clustered MSMQ instance fails to come online, see <https://www.veritas.com/docs/100013300>.
- 13 See <https://www.veritas.com/docs/100040696>.
- 14 Requires Enterprise Vault 12.2.

Citrix

Veritas provides client support for Citrix-based thin client provisioning. This support is limited to the installation and use of the Enterprise Vault client for Outlook. Support for Vault Cache and Virtual Vault is included if the following criteria are satisfied:

- Vault Cache and Virtual Vault must be configured in header-only mode (no content caching).
- The network connecting the Citrix server and file server hosting the Vault Cache and Virtual Vault files must offer high speed and low latency.
- Servers must be Windows 2008 R2 or later.
- Outlook 2010 or later is required.
- Enterprise Vault Outlook Add-In 10.0.4, 11.0, 11.0.1, 12 or later is required.

Veritas does not currently support any aspect of its Enterprise Vault server infrastructure provisioned via Citrix.

- 8 AlwaysOn Availability Groups are not supported.
- 9 Enterprise Vault 12.2 is supported with Backup Exec 16 FP2 and later.
- 10 Veritas NetBackup Agent for Enterprise Vault does not support Enterprise Vault in an environment clustered using VCS. See <https://www.veritas.com/docs/100001149>.
- 11 Requires NetBackup 7.6.0.1 or later.
- 12 Requires NetBackup 7.6.0.4 or later.
- 13 Enterprise Vault 12.2 is not supported.
- 14 Enterprise Vault 12.2 is supported with NetBackup 8.1 with Emergency Engineering Binary (EEB). See <https://www.veritas.com/docs/100040487>.

FIPS 140-2 compliance

Federal Information Processing Standards (FIPS) 140-2 is a standard for cryptographic modules in computer systems.

The table in this section shows the versions of Enterprise Vault, Compliance Accelerator, and Discovery Accelerator that are FIPS 140-2-compliant.

Where the Enterprise Vault documentation states that a version of Enterprise Vault is FIPS 140-2-compliant, it means that:

- Enterprise Vault uses FIPS 140-2-validated instances of algorithms and hashing functions in all instances where data is encrypted or hashed.
- Enterprise Vault manages cryptographic keys and message authentication in a secure manner, as required of FIPS 140-2-validated cryptographic modules.

Information about Enterprise Vault compliance with the FIPS 140-2 standard is available for the following versions of Enterprise Vault: [10.0.1](#), [11.0](#), and [12](#).

Table 2-15 FIPS 140-2 compliance

IPv6 support

General support for IPv6 was introduced in Enterprise Vault versions 9.0.3 and 10.0.1.

Note that SMTP archiving is supported in an IPv6 environment with the new version of Enterprise Vault SMTP Archiving in 11.0.1 and later. The legacy SMTP archiving is not supported in an IPv6 environment.

Storage devices, appliances, and software

This chapter includes the following topics:

- [Introduction](#)
- [Storage devices: CIFS/SMB](#)
- [Storage devices: streamer API](#)
- [Dell EMC Centera and Atmos](#)
- [Storage software: NTFS](#)
- [Secondary storage devices](#)
- [Secondary storage software](#)

Introduction

This chapter contains information about compatibility between Enterprise Vault and the storage products to which it can archive data.

Where appropriate, the tables in this chapter indicate the specific third-party product version that was tested with Enterprise Vault.

If there is a subsequent minor release that provides fixes without changing existing functionality, Veritas supports use of Enterprise Vault with that minor release unless stated otherwise.

Veritas supports archiving from Enterprise Vault to any high-performing disk storage that is:

- A directly attached or Storage Area Network (SAN) attached volume formatted as NTFS.

- Network Attached Storage (NAS) that is accessible over the CIFS/SMB protocol. For more information, see <https://www.veritas.com/docs/100038067>.
- Supported by an Enterprise Vault Storage Streamer API implementation.
- A Network File System (NFS) share. For more information, see <https://www.veritas.com/docs/100038223>.

Veritas does not support cloud storage (direct or via cloud storage gateways) as a primary storage location to store archived data. You can only use cloud storage as a secondary storage location to store data.

See “[Secondary storage devices](#)” on page 39.

Storage devices: CIFS/SMB

The following table shows Enterprise Vault support for primary storage devices using access over the CIFS/SMB protocol.

- 1 Both WORM and non-WORM features supported.
- 2 The Enterprise Vault PST Locator task does not find PST files on a Dell EMC Celerra or VNX Series device.
- 3 Requires Enterprise Vault 10.0.1 or later service pack.
- 4 Enterprise Vault 10.0.3 or later service pack is recommended.
- 5 Enterprise Vault 10.0.4 is recommended.
- 6 Requires Enterprise Vault 12 or later.
- 7 Partition rollover is not supported from this version onward.
- 8 Non-WORM only.
- 9 See [Dell EMC Isilon share configuration for Enterprise Vault](#).
- 10 Non-WORM only for Enterprise Vault 10.0.2, and 10.0.3. WORM is also supported by Enterprise Vault 10.0.4.
- 11 Requires Enterprise Vault 10.0.2 or later service pack.
- 12 All new HCP partitions must be created with the HCP Adapter for Veritas Enterprise Vault. CIFS support is provided only for customers with existing CIFS partitions on HCP devices.
- 13 Enterprise Vault retention categories that would cause a retention date later than January 19, 2038 are not supported. Infinite retention is not supported.
- 14 Requires specific device configuration. Contact the storage vendor for more information.
- 15 See <https://www.veritas.com/docs/100023470>.

- 16 In the Enterprise Vault Administration Console, select “HP StoreAll Storage” to create a partition on this device.
- 17 See http://h20565.www2.hp.com/hpsc/doc/public/display?docId=a00021465en_us.
- 18 See <http://support-open.huawei.com/ready/pages/user/compatibility/support-matrix.jsf>.
- 19 The Enterprise Vault PST Locator task will not find PST files on a MultiStore (vFiler) system. The PST Locator task will find PST files on a NearStore system that is running ONTAPI 1.4 or above.
- 20 Does not support collection and migration of files on primary partition on Clustered Data ONTAP.
- 21 Supports Data ONTAP 7-mode and Clustered Data ONTAP.
- 22 See [Configuring the file system archival solution](#).
- 23 WORM only.
- 24 Enterprise Vault’s Create Vault Store Partition with security ACLs feature is not supported.
- 25 WORM is supported with ONTAP 9.0 P1 and later.
- 26 Quantum StorNext Appliances were formerly known as Quantum Artico.
- 27 For more information, see <https://www.veritas.com/product/software-defined-storage/infoscale-enterprise>.
- 28 See <https://www.veritas.com/docs/100040037>.
- 29 WORM is supported with Veritas Access 7.3 or later.
- 30 All versions of FileStore (5.0 to 5.7 MP1) reached End of Support Life at the end of 2014. To upgrade to Enterprise Vault 11.0 and maintain a supported configuration, you must move all data from the existing vault store partitions on FileStore to new vault stores. For more information about moving vault store partitions, see <https://www.veritas.com/docs/100016652>. In some circumstances, it may be possible and preferable to move the archives associated with these partitions. See <http://www.veritas.com/community/varticles/new-ev-whitepaper-migration-tools-overview> for details about moving archives.
- 31 See <https://www.veritas.com/docs/100039174>.
- 32 Requires specific device configuration. Contact the storage vendor at storage-pm@ts.fujitsu.com for more information.

- 1 Both WORM and non-WORM features supported.
- 2 Caringo CASTor is now Caringo Swarm. See [CASTor evolves to Caringo Swarm](#). However, all existing partitions created in Enterprise Vault are displayed as Caringo CASTor.
- 3 Enterprise Vault 11.0 OR is supported with Caringo Enterprise Vault Streamer (CEVS) version 1.2.
- 4 Enterprise Vault 11.0.1 is supported with Caringo Enterprise Vault Streamer (CEVS) version 1.3.

- 7 WORM only.
- 8 Requires Enterprise Vault 11.0.1 Cumulative Hotfix 5 or later.
- 9 Contact the storage vendor to obtain the appropriate streamer software and any additional configuration documentation for your storage device, which you must install before you create the partition.
- 10 Requires HCP Adapter for Veritas Enterprise Vault version 1.1.12 or later service release. Note that version 1.1.12 fixes the issue described in <https://www.veritas.com/docs/100027322>.
- 11 Version 1.1.12 of the HCP Adapter for Veritas Enterprise Vault is the minimum supported version for existing implementations. Note that version 1.1.12 fixes the issue described in <https://www.veritas.com/docs/100027322>. However, Veritas recommends you upgrade to HCP Adapter for Veritas Enterprise Vault version 1.2.*n* or later. Version 1.3.*n* is supported from Enterprise Vault 10.0.4.
- 12 Requires streamer version 1.2.*n*, 1.3.*n*, or 1.4.*n* of the HCP Adapter for Veritas Enterprise Vault.
- 13 Non-WORM feature support is pending.
- 14 Requires Enterprise Vault 10.0.4.
- 15 Requires streamer version 1.3.*n* of the HCP Adapter for Veritas Enterprise Vault.

- 16 Requires streamer version 1.4.3.3 of the HCP Adapter for Veritas Enterprise Vault.
- 17 IBM Cloud Object Storage was formerly known as Cleversafe dsNet. Supported for on-premises private cloud storage use only.
- 18 See <http://ibm.biz/BdsaXB>.
- 19 Non-WORM supported.
- 20 Netapp StorageGRID now supports Enterprise Vault Simple Storage Service (S3) API storage migrator as a secondary storage (see [Migrating Data Using the Simple Storage Service \(S3\) API](#)).
- 21 Requires Enterprise Vault 10.0.2 or later service pack.
- 22 Requires NetApp streamer 1.0.0 or later.
- 23 Requires Storiant Link: Enterprise Vault 1.0.0 or later.

Dell EMC Centera and Atmos

The following table shows Enterprise Vault support for Dell EMC Centera and Atmos for primary storage.

Table 3-3 Dell EMC Centera and Atmos

Item	Enterprise Vault		
	10.0	11.0	12
Dell EMC Centera	Y	Y	Y
Dell EMC Atmos	Y [1,2]	Y [1]	Y [1]

- 1 For more information about configuring Dell EMC Atmos for use with Enterprise Vault, see the following article on the Dell EMC website (requires registration): http://support.emc.com/docu43369_White-paper:-Configuring-Applications-to-Access-Atmos-via-CAS.pdf
- 2 There is a limitation in Enterprise Vault versions prior to 10.0.2, where the EVSVR interactive mode Dump Saveset command fails when it creates the Clip Descriptor File if the content address of the clip contains the “/” character.

Dell EMC Centera SDK, CentraStar, and Atmos

The following tables show which version of the Dell EMC Centera SDK is supplied with each Enterprise Vault version, and the CentraStar and Atmos releases against which testing was performed.

In the **CentraStar version** and **Atmos version** columns in the tables, *n* represents any minor version number. For example, 4.0. *n* indicates that versions 4.0.0-2153-929-20439 and 4.0.1-2711-955-20523 are supported.

Notes:

- If you are planning to upgrade Enterprise Vault, check with Dell EMC that the version of CentraStar/Atmos you are using is supported by that SDK is supplied with the upgraded version of Enterprise Vault.
- For optimum performance, and to ensure adoption of Dell EMC Centera best practices, Veritas recommends using the Centera in CPM mode. Enterprise Vault is pre-configured for Centera with all best practice settings.

Table 3-4 Centera SDK and CentraStar

- ◆ A standard NTFS file system mounted on fast access media (such as SAN, NAS, or DAS) is an acceptable platform for Enterprise Vault, offering speed, scalability, and security. Some vendors offer an NTFS front-end to other media (such as offline or WORM). Enterprise Vault should work with such systems, but care should be taken of their specific characteristics, such as slower access speeds. It is recommended that the index data is not placed on such alternate media, even though it is NTFS-based.

Secondary storage devices

The secondary storage devices in the table below require migration of data contained in Enterprise Vault collection files. For more information about migrating Enterprise Vault data to these secondary storage devices, see the technical notes referred to in the table footnotes.

- 7 Requires specific configuration. Contact the storage vendor for more information.
- 8 Requires HCP Adapter for Enterprise Vault version 1.2.2 or later.
- 9 Contact the storage vendor to obtain the appropriate streamer software for your storage device, which you must install before you create the partition.
- 10 Requires Enterprise Vault 10.0.4.
- 11 Requires Enterprise Vault 11.0.1.
- 12 Uses the Enterprise Vault migrator software. Contact the storage vendor for more information.
- 13 Select "Huawei Object Store" in the Enterprise Vault Administration Console. Contact the storage vendor for more information.
- 14 For on-premises configuration using CIFS, use the Enterprise Vault migrator software. For on-premises or public cloud configuration using S3, select "Huawei Object Store" in the Enterprise Vault Administration Console. Contact the storage vendor for more information.
- 15 Requires 12.2 or later. See [Migrating Data Using the Microsoft Azure Blob Storage Migrator](#).

- 1** The use of Outlook 2013 on the Enterprise Vault is not supported for Exchange Server 2003 targets.
- 2** The following are required on each Windows 2003 Server on which you install the Enterprise Vault Outlook Web Access (OWA) 2003 Extensions: Windows Server 2003 Service Pack 2 or later and Exchange Server 2003 Service Pack 1 or later.
- 3** Exchange Server 2010 is not supported with Outlook 2016 on Enterprise Vault server.
- 4** See <https://www.veritas.com/docs/100009302>.
- 5** To run Enterprise Vault archiving with MAPI over HTTP on Exchange Server 2013 SP1 or later service packs, see <https://www.veritas.com/docs/100040583>.
- 6** Outlook 2016 on Enterprise Vault server supports only MAPI over HTTP on Exchange Server 2013 SP1 and Exchange Server 2016 with Enterprise Vault 12.2. Does not support Outlook Anywhere and RPC connection methods.
- 7** Public folder archiving is not supported with Outlook 2016 on Enterprise Vault server.
- 8** Requires Enterprise Vault 10.0.3 with the appropriate hotfix (see <https://www.veritas.com/docs/100028462>), or later service pack.
- 9** See <https://www.veritas.com/docs/100040692> for the latest information about Exchange Server 2013 cumulative update support.
- 10** Requires Enterprise Vault 10.0.4 Cumulative Hotfix 3 or later.
- 11** Requires all recommended Interim Updates for Exchange 2013 CU6 and CU7. These Interim Updates are available on request from Microsoft, and you should quote KB3011579 in your request. See [KB3011579](https://www.veritas.com/docs/100014498) and <https://www.veritas.com/docs/100014498>.
- 12** Requires Enterprise Vault 11.0.1 Cumulative Hotfix 1 or later.

- 13 Requires Enterprise Vault 11.0.1 Cumulative Hotfix 4 or later.
- 14 When you run the script to enable the Enterprise Vault Office Mail App, if you get an error "GetExchangeActAsUserTokenHandler needs to be set to support X-RF cases", run the Get-App command and then run the script again. Microsoft has fixed this issue in CU2.

Exchange Online

- 1 Requires two hotfixes for Data Loss Prevention 11.1. For more information, see <https://www.veritas.com/docs/100025533>.
- 2 See <https://www.symantec.com/connect/articles/upgrade-dlp-enforce-manually>.

Exchange Server 2003 OWA control file versions

Exchange Server 2003 service packs and hotfixes may modify OWA control files. For supported versions of Exchange Servers, OWA control files and Enterprise Vault, see <https://www.veritas.com/docs/100040694>.

Enterprise Vault OWA Extensions compatibility with Enterprise Vault Server

The following table shows the compatibility of Enterprise Vault OWA Extensions with Enterprise Vault Server versions.

Table 4-4 Enterprise Vault OWA Extensions compatibility with Enterprise Vault Server

About Exchange archiving client compatibility

This chapter contains information about compatibility with Enterprise Vault Exchange archiving client components.

The "File System Archiving (FSA)" chapter provides information on the operating systems that FSA supports for placeholder and file internet shortcut access.

See the "Compliance Accelerator and Discovery Accelerator" chapter for information on their compatibility with other client components.

Windows operating systems for Outlook Add-In

The following table shows the supported combinations of Windows operating systems and the Enterprise Vault Outlook Add-In.

- 1 Requires Enterprise Vault Outlook Add-In 10.0.3 or later.
- 2 Requires Enterprise Vault server and Outlook Add-In 10.0.4.
- 3 Requires Enterprise Vault server and Outlook Add-In 11.0.1 Cumulative Hotfix 3 or later.
- 4 Requires Enterprise Vault 11.0.1 Cumulative Hotfix 4.
- 5 Requires Microsoft hotfix [KB2878182](#).
- 6 Enterprise Vault Servers on a Windows Server 2012 require additional configuration before you use Enterprise Vault Search, see [KB2803161](#).
- 7 Requires Enterprise Vault server and Outlook Add-In 10.0.4 Cumulative Hotfix 3 or later.
- 8 Requires Enterprise Vault 12.1 or later.

Note: The language variants of the Enterprise Vault Outlook Add-Ins are tested against new releases from Microsoft for each major Enterprise Vault release (for example, Enterprise Vault 11.0). The language variants are fully supported for Service Packs but are only tested if there is a known language dependency.

Windows email clients

The following table shows the supported combinations of email clients and the Enterprise Vault Outlook Add-In.

- 1 See <https://www.veritas.com/docs/100017406>.
- 2 An issue exists in Outlook 2003 SP3 and Outlook 2007, with items that have 2048 or more recipients in the TO, CC or BCC fields, or have more than 2048 attachments. If you are likely to be affected by this issue, it is addressed by Microsoft hotfixes. For Outlook 2003 SP3, see [KB948073](#). For Outlook 2007, see [KB951995](#). The recommended registry value is 0xFFFFFFFF.
- 3 Outlook 2010 support requires the Enterprise Vault HTTP-Only Outlook Add-In.
- 4 If you are running the Outlook 2010 cumulative update released on July 11, 2011 (available at [KB2544027](#)) or SP1, see <https://www.veritas.com/docs/100006380>.
- 5 Requires Enterprise Vault server and Outlook Add-In 10.0.3 or later service pack.
- 6 Requires Enterprise Vault server and Outlook Add-In 11.0.1 Cumulative Hotfix 4 or later.
- 7 Enterprise Vault Outlook Add-In is only supported with on-premises Exchange server accounts. It is not supported with Exchange Online accounts.
- 8 Latest build number that has been tested with Enterprise Vault.

Web browsers

See “[Web browsers](#)” on page 21.

Browser support for Enterprise Vault Office Mail App for Exchange 2013 and Exchange 2016

Note: Exchange 2016 is supported from Enterprise Vault 11.0.1 Cumulative Hotfix 4 and later and on Enterprise Vault 12 and later.

Desktop search utilities

For information about making the Enterprise Vault Add-Ins available, see the Enterprise Vault *Setting up Exchange Server Archiving* guide.

Windows Search (WS)

Enterprise Vault supports WS with the following combinations of Windows and Microsoft Office:

- 64-bit Windows with 64-bit Microsoft Office
- 32-bit Windows with 32-bit Microsoft Office
- 64-bit Windows (except Vista) with 32-bit Microsoft Office

Enterprise Vault supports the use of JAWS for Windows version 12 with Microsoft Office Outlook 2010.

Enterprise Vault does not support JAWS with the Enterprise Vault web applications, including Outlook Integrated Search (Search Vaults) and Archive Explorer.

For more information about Enterprise Vault and Section 508 Compliance, see <https://www.veritas.com/docs/100029628>.

File System Archiving (FSA)

This chapter includes the following topics:

- [Content platforms](#)
- [Client access](#)
- [Content protocols](#)
- [Supported Windows components](#)
- [Cluster support for FSA services](#)
- [Supported applications](#)
- [Enterprise Vault server and FSA Agent/Placeholder service component](#)

Content platforms

Support for FSA Agent

Note: File System Archiving does not support FAT32 file systems.

Enterprise Vault File System Archiving requires an FSA Agent to be installed on the target file server to allow Windows placeholders to be created and accessed. The FSA Agent is supported for use with the following operating systems.

- 1 For more information on archiving and Internet shortcuts on CIFS compliant platforms, see <https://www.veritas.com/docs/100022216>.
- 2 This version is a minimum requirement on a file server if you are installing the FSA Agent/Placeholder service using the Install FSA Agent or Install Placeholder wizard in the Administration Console. If you install the FSA Agent/Placeholder service by running the MSI Installer kit, then this version is not mandatory.
- 3 The Enterprise Vault FSA Reporting Web service is not supported on Windows Server 2003 x64 edition (using WOW64).
- 4 Enterprise Vault 11.0.1 Cumulative Hotfix 4 or later and Enterprise Vault 12 or later do not support Windows Server 2008 as an FSA target. The minimum supported version is Windows Server 2008 R2 SP1 with Microsoft Security Update <https://technet.microsoft.com/en-us/library/security/3033929>.
- 5 Requires Enterprise Vault server and FSA Agent 10.0.3 or later service pack.
- 6 Secure Boot is not supported. For more information, see <https://www.veritas.com/docs/100041724>.
- 7 Requires Enterprise Vault server and FSA Agent 10.0.4.
- 8 On file servers running Windows Server 2012 R2, the Enterprise Vault 11.0 FSA Agent does not create placeholders for files if the path length exceeds 256 characters. Use Enterprise Vault 11.0.0 Cumulative Hotfix 1 or later, or the 11.0.1 FSA Agent.
- 9 Requires Enterprise Vault server and FSA Agent 12.1 or later.

Unix, Linux, and NFS

Enterprise Vault File System Archiving supports archiving of Linux, Unix, and NetApp NFS volumes using Vault Solutions Archive Accelerator for NFS. See <https://www.vault-solutions.com/products/archive-accelerator-nfs>.

- 1 Enterprise Vault 10.0.1 and later service packs, and Enterprise Vault 11.0 support access to placeholders on Dell EMC Celerra Data Mover HTTP Server using SSL. SSL connections are not supported for VNX Series devices.
- 2 For more information, see <https://www.veritas.com/docs/100012979>.
- 3 Requires Enterprise Vault server 10.0.4.
- 4 Requires Enterprise Vault server 11.0.1.

Support for NetApp Data ONTAP

Enterprise Vault File System Archiving is supported to archive from NetApp Data ONTAP using CIFS, as shown in the following table.

The major and minor releases of Data ONTAP are supported, in accordance with NetApp's recommendations. In the following table, *n* represents any minor version number.

- 1 Supports Data ONTAP 7-mode.
- 2 Requires Enterprise Vault server 10.0.1 or later service pack.
- 3 Requires Enterprise Vault server 10.0.4.
- 4 Enterprise Vault server 11.0.1 supports Clustered Data ONTAP.
- 5 For recommendations for migrating FSA archives from NetApp 7-Mode filers to NetApp C-Mode Vservers, see <https://www.veritas.com/docs/100015810>.
- 6 Enterprise Vault server 12 and later support Clustered Data ONTAP.
- 7 Requires Enterprise Vault 11.0.1 Cumulative Hotfix 3 or later.

- 8 NetApp ONTAP 8.3.1 or later is not supported for file system archiving.
- 9 Pass-through is not supported for Data ONTAP C-Mode Vservers.
- 10 NetApp ONTAP 8.3, 8.3.1, and 8.3.2 are supported for file system archiving.
- 11 Requires Enterprise Vault server 12.1 or later.

Support for IBM N series

Enterprise Vault File System Archiving is supported to archive from IBM N series enterprise storage using CIFS, as shown in the following table.

Table 6-5 Support for IBM N series

- 1 Supports Data ONTAP 7-mode.
- 2 Requires Enterprise Vault server 10.0.1 or later service pack.
- 3 Requires Enterprise Vault server 10.0.4.
- 4 Enterprise Vault server 11.0.1 supports Clustered Data ONTAP.
- 5 For recommendations for migrating FSA archives from NetApp 7-Mode filers to NetApp C-Mode Vservers, see <https://www.veritas.com/docs/100015810>.
- 6 Enterprise Vault server 12 and later support Clustered Data ONTAP.

Client access

Supported client access

Enterprise Vault File System Archiving supports the following operating systems for placeholder and file internet shortcut access.

Note: For certain file types, such as .doc, .xls and so on, Enterprise Vault does not support offline synchronization of placeholders using Sync Center on file servers running Windows Server.

Table 6-7 Supported client access

- 12 All versions of FileStore (5.0 to 5.7 MP1) reached End of Support Life at the end of 2014. To upgrade to Enterprise Vault 11.0 and maintain a supported configuration, you must move all data from the existing vault store partitions on FileStore to new vault stores. For more information about moving vault store partitions, see <https://www.veritas.com/docs/100016652>. In some circumstances, it may be possible and preferable to move the archives associated with these partitions. See <http://www.veritas.com/community/articles/new-ev-whitepaper-migration-tools-overview> for details about moving archives.

Supported Windows components

Enterprise Vault File System Archiving placeholder and file internet shortcuts have been tested with the following Windows components. If a Windows component does not appear on this list, it is advisable to perform a proof of concept validation of a production system prior to installation.

Note: Where applicable, the support shown is based on the Enterprise Vault FSA Agent/Placeholder service and application hosted on the same file server.

- 1** Enterprise Vault 11.0.1 Cumulative Hotfix 4 and later do not support Windows Server 2008 as an FSA target. The minimum supported version is Windows Server 2008 R2 SP1.
- 2** Requires Enterprise Vault server and FSA Agent 12.1 or later.
- 3** A single mount point created as an Enterprise Vault volume and all its subfolders are supported. The subfolders can also be archiving targets. Neither nested mount points nor volume targets added above the mount point are supported.
- 4** Enterprise Vault does not write files to the root of the mount point if you have logged in using the Vault Service account. You must create a folder within the mount point to hold the files.
- 5** A single junction point created as an Enterprise Vault volume and all its subfolders are supported. The subfolders can also be archiving targets. Nested junction points are not supported.

- 6 Enterprise Vault will retain Alternate Data Streams on Placeholders.
- 7 An archived file that was originally compressed with Windows compression will be recalled uncompressed when accessed through FSA. The recalled file cannot be re-compressed with Windows compression due to a Microsoft limitation.
- 8 Supports only the addition of physical file server paths hosting DFS shares as archiving targets. Does not support the addition of DFS Namespace as an archiving target. Supports access to placeholders from client computer using DFS virtual namespace. Archive Explorer and Browser Search display the full physical file server path and not the DFS "virtual" path. For more information, see <https://www.veritas.com/docs/100017525>.
- 9 Requires Enterprise Vault server and FSA Agent 10.0.4.
- 10 Only internet shortcuts are supported. Placeholders are not supported.
- 11 The version of Windows Server 2003 that is supported is Windows Server 2003 SP2.

Cluster support for FSA services

The following table shows the cluster server software that can be used to provide high availability of the Enterprise Vault FSA services.

Support for the cluster server software shown in the table is built in to Enterprise Vault.

- 1** Requires Enterprise Vault server and FSA Agent 10.0.2 or later service pack.
- 2** Requires Enterprise Vault server and FSA Agent 10.0.1 or later service pack.
- 3** Enterprise Vault 11.0.1 Cumulative Hotfix 4 and later do not support Windows Server 2008 as an FSA target. The minimum supported version is Windows Server 2008 R2 SP1.
- 4** Requires Enterprise Vault server and FSA Agent 10.0.3 or later service pack.
- 5** Active/passive and active/active clusters are supported.

- 6 On file servers running Windows Server 2012 R2, the Enterprise Vault 11.0 FSA Agent does not create placeholders for files if the path length exceeds 256 characters. Use Enterprise Vault 11.0.0 Cumulative Hotfix 1 or later, or the 11.0.1 FSA Agent.
- 7 Requires Enterprise Vault server and FSA Agent 12.1 or later.
- 8 Enterprise Vault supports only non-secure clusters.
- 9 See <https://www.veritas.com/docs/100010265>.
- 10 Requires Enterprise Vault server and FSA Agent 10.0.4.
- 11 Requires Enterprise Vault server 11.0.1.
- 12 Requires Enterprise Vault server and FSA Agent 12.2 or later.

Operating system requirements when configuring when configuring FSA with clustered file servers

To configure FSA with clustered file servers running on Enterprise Vault 10.0 OR, you must run the Administration Console on a computer with a suitable operating system.

For more information, see <https://www.veritas.com/docs/100021231>.

This restriction does not apply to Enterprise Vault 10.0.1 and later service packs.

Supported applications

Enterprise Vault File System Archiving placeholder and file internet shortcuts have been tested with the following applications. If a third-party application does not appear on this list, it is advisable to perform a proof of concept validation of a production system prior to installation.

Notes:

- Where applicable, the support shown is based on the Enterprise Vault FSA Agent/Placeholder service and application hosted on the same file server.
- Use of some unsupported third-party file managers can result in corruption of placeholders and potential data loss.

Enterprise Vault server and FSA Agent/Placeholder service component

It is possible to combine the optional Enterprise Vault FSA Agent/Placeholder service component with a different version of the Enterprise Vault server, as shown in the following table.

Note: Support is provided for backwards compatibility, but new features may not be available until the FSA Agent/Placeholder service version is aligned with the Enterprise Vault server version.

Domino mailbox archiving and journal archiving

This chapter includes the following topics:

- [Notes client on the Enterprise Vault Server](#)
- [Enterprise Vault Domino Gateway](#)
- [Enterprise Vault extensions for Notes and iNotes/DWA clients](#)
- [Enterprise Vault web applications](#)

Notes client on the Enterprise Vault Server

Notes must be installed on the Enterprise Vault server to support Domino mailbox and journal archiving. The following table shows the versions of Notes that are supported on the Enterprise Vault server.

Note that the version of Notes installed on the Enterprise Vault server must be equal to, or later than the version of Domino on the server from which you want to archive. For example, to archive from Domino 8.5.3 on Enterprise Vault 10.0, you must install Notes 8.5.3 or later, which is supported on Enterprise Vault 10.0 servers, and is later than the version of Domino on the target server.

Table 7-1 Notes client on the Enterprise Vault Server

Item	Version	Enterprise Vault		
		10.0	11.0	12
Lotus Notes	8.0.x, 8.5, 8.5.1	N	N	N
	8.5.2	Y	N	N
	8.5.3	Y [1]	Y	Y
IBM Notes	9.0, 9.0.1	Y [2]	Y	Y

1 Requires Enterprise Vault 10.0.1 or later service pack.

2 Requires Enterprise Vault 10.0.4 Cumulative Hotfix 3 or later.

Enterprise Vault Domino Gateway

The following table shows support for Enterprise Vault with versions of Notes and Domino Server on an Enterprise Vault Domino Gateway.

Note: Enterprise Vault version 10.0.2 and earlier do not support 64-bit Domino Server on the Enterprise Vault Domino Gateway. 64-bit Domino Server on the Enterprise Vault Domino Gateway requires Enterprise Vault 10.0.3 or later service packs.

You must install both Notes and Domino on the Enterprise Vault Domino Gateway, and you must install the same version of each.

You must have at least a Domino Messaging server license for each Enterprise Vault Domino Gateway.

Note: In a production environment, the Enterprise Vault Domino Gateway should not be used as a general mail server.

If you run EVInstall.nsf on any computer other than the Enterprise Vault Domino Gateway, ensure that you use a version of Notes that is shown as supported in the following table.

SharePoint archiving

This chapter includes the following topics:

- [SharePoint server versions](#)
- [Windows SharePoint Services \(WSS\)](#)
- [SharePoint indexing](#)
- [Office Online Server](#)
- [OneDrive for Business](#)
- [Enterprise Vault for SharePoint support in an RBS environment](#)

SharePoint server versions

SharePoint archiving depends on the installation of Enterprise Vault SharePoint components on the SharePoint server. The version of the Enterprise Vault SharePoint components must match the version of the Enterprise Vault server that targets the SharePoint server.

- 2 Supports SharePoint installed on Windows 2008 R2 SP1 and later only.
- 3 Requires Enterprise Vault 10.0.4.
- 4 Requires Enterprise Vault 10.0.3 or later service pack.
- 5 Requires Enterprise Vault 12.1 or later.
- 6 For SharePoint 2016, shortcut processing may be slower. See <https://www.veritas.com/docs/100033096>.

SharePoint indexing

Enterprise Vault SharePoint shortcuts are compatible with Microsoft FAST Search Server 2010 for SharePoint. Archived content that has been replaced with shortcuts can be indexed both by FAST, and by the standard SharePoint index.

Note that Veritas has not certified FAST for other Enterprise Vault content sources.

Office Online Server

Office Online Server is an Office server product that provides browser-based file viewing and editing services for Office files. An Office Online Server farm can support users who access Office files through SharePoint Server, Exchange Server, shared folders, and websites.

Table 8-3 Office Online Server

2 Requires Enterprise Vault 12.2.1.

OneDrive for Business

OneDrive for Business allows you to store, sync, and share your files from anywhere and work on Office documents with others at the same time.

Enterprise Vault supports syncing of archived documents from users' My Site libraries in on-premises SharePoint using OneDrive for Business sync client.

- 3 Requires Enterprise Vault 12.1 or later.

Enterprise Vault for SharePoint support in an RBS environment

Due to the design of Enterprise Vault and how it interacts with the SharePoint system, it is expected that Enterprise Vault will work with any Remote BLOB (Binary Large Object) Storage (RBS) solution.

For details, see <https://www.veritas.com/docs/100025463>.

SMTP archiving

This chapter includes the following topics:

- [About SMTP archiving](#)

About SMTP archiving

Enterprise Vault 11.0.1 and later support a new implementation of SMTP Archiving.

Enterprise Vault SMTP Archiving enables Enterprise Vault to archive data that is sent to the Enterprise Vault server using SMTP protocol. Any application that can send information to an SMTP server can send data to Enterprise Vault.

Enterprise Vault 11.0.1 and later support Enterprise Vault SMTP Archiving on all supported operating systems.

See [“Operating system”](#) on page 12.

The new implementation of SMTP Archiving does not require the Windows SMTP service or File System Archiving.

The legacy version of Enterprise Vault SMTP Archiving, available with Enterprise Vault 11.0 OR and earlier versions, can run concurrently with the new version. The legacy version and the new version must use different port numbers.

Skype for Business Archiving

This chapter includes the following topics:

- [About Skype for Business Archiving](#)
- [Communication platform](#)

About Skype for Business Archiving

Enterprise Vault 12.2 lets you archive Skype for Business Server and Lync Server instant messaging (IM) and conferencing (meeting) communications.

You must install the Skype for Business Server or Lync Server administrative tools on the Enterprise Vault server. The version must match the version of Skype for Business Server or Lync Server that you are using.

The language version of Enterprise Vault, the Skype for Business Server or Lync Server, and the server operating system must all be the same. Also, the language version of Skype for Business and Skype for Business tools must match.

An Enterprise Vault server can target archiving from only Skype or Lync but not from both. You also cannot archive between domains.

Skype for Business Server can archive conversations to a SQL Server database or to an Exchange Server mailbox. However, Enterprise Vault only supports archiving to a SQL Server database.

Enterprise Vault supports Skype for Business Archiving on all the supported operating systems.

See [“Operating system”](#) on page 12.

Enterprise Vault Search

This chapter includes the following topics:

- [About Enterprise Vault Search](#)
- [Desktop](#)
- [Tablet](#)
- [Mobile](#)

About Enterprise Vault Search

Enterprise Vault Search replaces three legacy search applications: Archive Explorer, Browser Search, and Integrated Search. Enterprise Vault Search provides client users with all the browse and search features that are available in those applications.

Enterprise Vault 11.0 supports Enterprise Vault Search on desktops. Enterprise Vault 11.0.1 includes support for Enterprise Vault Search on mobiles and tablets.

This chapter details compatibility between Enterprise Vault Search and the supported operating systems and browsers on desktops, tablets, and mobiles.

Compliance Accelerator and Discovery Accelerator

This chapter includes the following topics:

- [Supported versions of Enterprise Vault in Accelerator environments](#)
- [Compatibility of Accelerator client and server components](#)
- [Compliance Accelerator](#)
- [Discovery Accelerator](#)
- [eDiscovery Platform](#)

Supported versions of Enterprise Vault in Accelerator environments

Note the following important points about the version of Enterprise Vault that you install in a Compliance Accelerator or Discovery Accelerator environment:

- All Enterprise Vault servers in all Enterprise Vault sites in an Accelerator environment must run the same version of Enterprise Vault. For example, when using Compliance Accelerator with two Enterprise Vault installations, you cannot have one site that runs Enterprise Vault 11.0 and another that runs Enterprise Vault 12.
- The major version of the Accelerator product must be the same as, or one later than, the major version of Enterprise Vault.
For example, you can run Discovery Accelerator 12 with Enterprise Vault 11.0.1 servers, but you cannot run Discovery Accelerator 11.0.1 with Enterprise Vault 12 servers.

Note: Compliance Accelerator 11.0 and Discovery Accelerator 11.0 are only compatible with Enterprise Vault 10.0.1 or later service packs. Compliance Accelerator 11.0.1 and Discovery Accelerator 11.0.1 are only compatible with Enterprise Vault 11.0.1. Compliance Accelerator 12 and Discovery Accelerator 12 are only compatible with Enterprise Vault 11.0.1 or later service packs.

- If the major version of the Accelerator product is the same as the major version of Enterprise Vault, the minor version (Service Pack) of the Accelerator product must be the same as, or later than, the minor version of Enterprise Vault. For example, you can run Compliance Accelerator 10.0.4 with Enterprise Vault 10.0.3 servers, but you cannot run Compliance Accelerator 10.0.3 with Enterprise Vault 10.0.4 servers.
- When upgrading both the Accelerator product and Enterprise Vault, it is important to upgrade the various components in the correct order. See the upgrade instructions that accompany your Accelerator product for details.

Compatibility of Accelerator client and server components

Both Compliance Accelerator and Discovery Accelerator are client/server applications. The version of the client software that you install on end-users' computers must exactly match that of the server software on the Compliance Accelerator or Discovery Accelerator server.

Compliance Accelerator

- 1 Requires Enterprise Vault 10.0.4.
- 2 For SQL Server 2005, we recommend that you install SP3 or later to resolve known issues when printing reports and exporting them in Excel format.
- 3 Requires Enterprise Vault 10.0.4.
- 4 Requires Enterprise Vault 10.0.2 or later service pack.
- 5 AlwaysOn Availability Groups are not supported.
- 6 The use of supplementary characters in the range U+10000 to U+10FFFF is not supported.
- 7 AlwaysOn Availability Groups are not supported on SQL Server 2012 SP2 CU3, CU4, and 2014 CU5. If you already have these versions of SQL Server installed, see [KB3034679](#) for the hotfix.
- 8 Requires Enterprise Vault 10.0.4 Cumulative Hotfix 3 or later.
- 9 Requires Enterprise Vault 11.0.1.
- 10 Requires Enterprise Vault 12.1 or later.
- 11 Enterprise Vault 11.0.1 and later require .NET Framework 4.5.2 or later as well as .NET Framework 3.5 SP1.
- 12 Enterprise Vault requires .NET Framework 3.5 SP1 even if a later version is already installed.
- 13 Supported only in Compatibility View. This limitation does not exist for Enterprise Vault 12.1 or later.
- 14 Required if you want to export to PST files.

- 15** Compliance Accelerator exports messages in MSG format. There are restrictions concerning the use of MSG format messages in different versions of Outlook. For more information, see <https://www.veritas.com/docs/100021973>.
- 16** Requires 32-bit version of Outlook if you want to export to PST files.

Server virtualization

Compliance Accelerator supports the use of all virtualization technologies that run supported versions of the Windows operating system. When you deploy Compliance Accelerator on virtual servers, consider the performance limitations of each virtualization platform relative to the minimum hardware requirements described in the Compliance Accelerator documentation.

Compliance Accelerator supports VMware High Availability, and the VMware vCenter Converter Standalone tool.

About antivirus software

For a list of recommended antivirus exclusions for Enterprise Vault, see <https://www.veritas.com/docs/100017720>.

Enterprise Vault placeholder shortcuts appear to the operating system as markers for offline files. Some antivirus programs can be configured to ignore offline files, but others cannot. For more information, see <https://www.veritas.com/docs/100018129>.
